

## **Australian Football skool**

### Description:

Football Skool is a program solely dedicated to developing young football players' skills and talents within a supportive and friendly environment.

The aim is to ensure that all boys and girls in the program have all the possible resources available in order for them to achieve all the necessary attributes to become highly effective players, as individuals and within a team environment.

The experienced and qualified coaching team are committed to providing all participants the opportunity to enhance their technical abilities and increase their confidence on and off the pitch. The professionalism and friendly experience will be evident from the moment of their selection at trials through to the final awards presentation night.

The program consists of both one-on-one and team development by qualified coaches, focusing on improving physical, technical and tactical abilities. The players will be exposed to different training environments such as, indoor soccer (Futsal); beach sessions, grass and synthetic surfaces.

A significant advantage of the program is that it offers an interzone competition which is held from October to February, providing players a continual focus on their sport and allowing them the opportunity to meet and compete with others within Victoria.

This is a proven model that has produced fantastic results, training and games will be conducted at great facilities all around Victoria.
